

Freedom of Information Request

Reference Number: [EPUT.FOI.19.1067](#)
Date Received: 7th May 2019

Information Requested:

I am emailing to request you to kindly complete the attached questionnaire with regards to neck of femur fractures sustained in patients who are taking novel oral anticoagulants.

We are seeking to determine, on a national level, what NHS Trust protocols advise for the management of patients who are taking NOACs (Novel Oral Anticoagulants; e.g. apixaban, rivaroxiban, dabigatran) who sustain a neck of femur fracture which requires surgical fixation.

Response:

Essex Partnership University NHS Foundation Trust is a Mental Health, Learning Disability and Community Services Trust and does therefore not provide treatment for Neck of Femur fractures or treatment with novel oral anticoagulants.

Publication Scheme:

As part of the Freedom of Information Act all public organisations are required to proactively publish certain classes of information on a Publication Scheme. A publication scheme is a guide to the information that is held by the organisation. EPUT's Publication Scheme is located on its Website at the following link <https://eput.nhs.uk/>
